## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims **1-26 and 41-42**, drawn to a system of fire detector, includes a transmitter, receiver and a fire suppression device, classified in class 340, subclass 584.
  - II. Claims **28-40**, drawn to a structure of a fire suppressant vessel, classified in class 169, subclass 30 .

2. The inventions are distinct, each from the other because of the following reasons:

The two classes are searches by different examiners. In order to provide the highest quality of work, it is best that each particular art unit prosecutes its own application. Since these two inventions are in two separate classifications, they require two separate searches. Therefore, the decision was made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
